

CAMPAIGN BOOK

BLIND • SPOTS

25 levels in 5 worlds for 3 or 4 players

How to use this book

Play the levels in order. Each page tells you everything you need to set up that level: colours, dice, mission cards and stars to win.

If you beat a level, tick the box for your player count and move on to the next one. If you lose, replay the level with new cards: every game is different.

Before each world there is a page with what is new in it. Read it aloud before playing the first level of that world.

The basic rules are in the rulebook. This book only tells you what changes in each level.

Mission card piles

Sort the mission cards into piles by stars. With 3 colours, leave out the cards that show yellow and those marked “4” in the bottom left corner (4 colours only); with 4 colours, use them all. These are the card numbers in each pile:

WORLD 1 · LEVEL 1–5

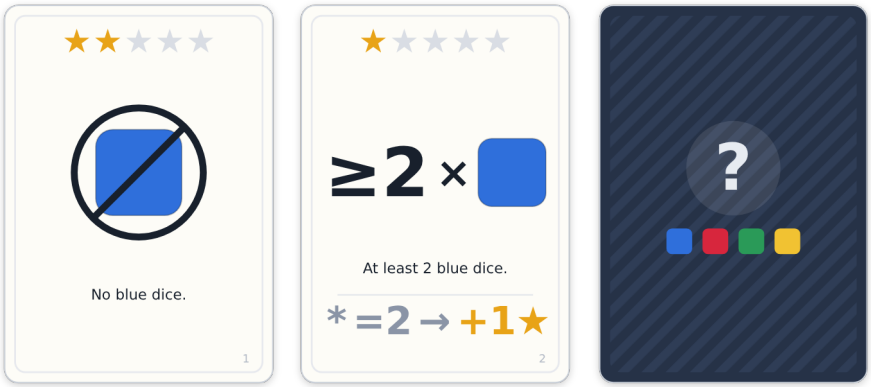

First Steps

The basic game

In this world you learn the basic game. There are no special rules: just dice in 3 colours (blue, red and green) and mission cards.

Each round, the dealer draws dice from the bag, rolls them and forms one group per player. Starting on their left, each player picks a group; the dealer keeps the last one.

At the end, reveal the cards. Add up the stars of the completed cards (plus bonus stars): if you reach the level's stars, you beat it.

Special Actions

New: action cards

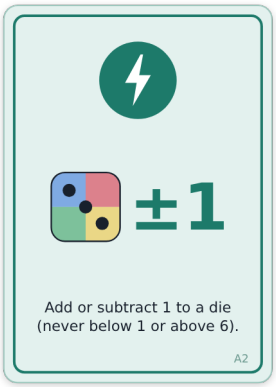

From this world on, the team has special actions: reroll a die, add or subtract 1, flip it (turn it to the opposite face: 1 becomes 6, 2 becomes 5…) and remove it (it goes back into the bag).

With 3 players, use 3 of the 4 action cards, at random; with 4 players, all 4.

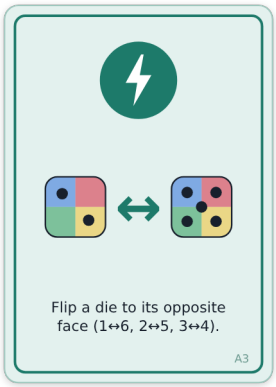

Each player may use just one action during the whole level, at any time and on any visible die: on the table or already in someone's area. Whoever uses it keeps the card: it is gone for everyone else, so agree on it together.

The Grey Die

New: grey die and grey cards

In round 1, the first dealer reveals a grey card that everyone can see and rolls the grey die together with the other dice.

Whoever ends the game with the grey die must meet the grey card. If not, the team loses the level even if it reaches the stars.

The grey die counts as a die, for sums and for values, but not as a colour. Think carefully about who should take it.

WORLD 4 · LEVEL 16–20

The Bomb

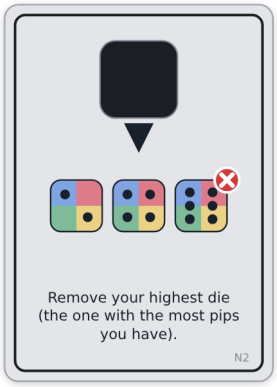

New: black dice and black cards

In these levels more dice are drawn each round (6 with 3 players, 8 with 4) and, on top of that, a black die is rolled every round.

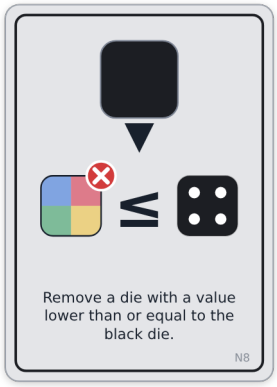

At the start of each round, before drawing any dice, the dealer reveals the top black card: everyone knows its effect before anyone takes the black die. The card is placed next to the black die and travels with it.

Each player may end up with only ONE black die: if you already have one, you can't take a group that has another. Watch the dealer: if they are left a group with a black die and already have one, the team loses the level at once.

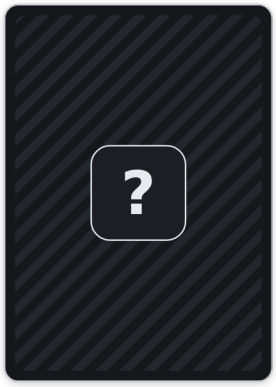

At the end of the game the bombs go off: whoever has a black die applies its card to their own dice and chooses which to remove. If no die fits the card, nothing happens. Black cards don't repeat until all have come out.
